

CS230: Deep Learning

Course Staff

Andrew Ng
Instructor

Kian Katanforoosh
Instructor

Swati Dube
Coordinator

Jon Braatz
Head TA

Course Assistants

Jo Chuang

Vineet Kosaraju

Shahab Mousavi

Advay Pal

Pranav Rajpurkar

Sherry Ruan

Chris Waites

Jingbo Yang

Leo Mehr

Kian Katanforoosh

Today's outline

I. Course Logistics

II. Introduction to Deep Learning Applications

III. Examples of student projects

Course Logistics

5 “courses”:

C1: Neural Networks and Deep Learning

C2: Improving Deep Neural Networks

C3: Strategy for Machine Learning Projects

C4: Convolutional Neural Networks

C5: Sequence Models

Example: C2M3: Course 2 Module 3

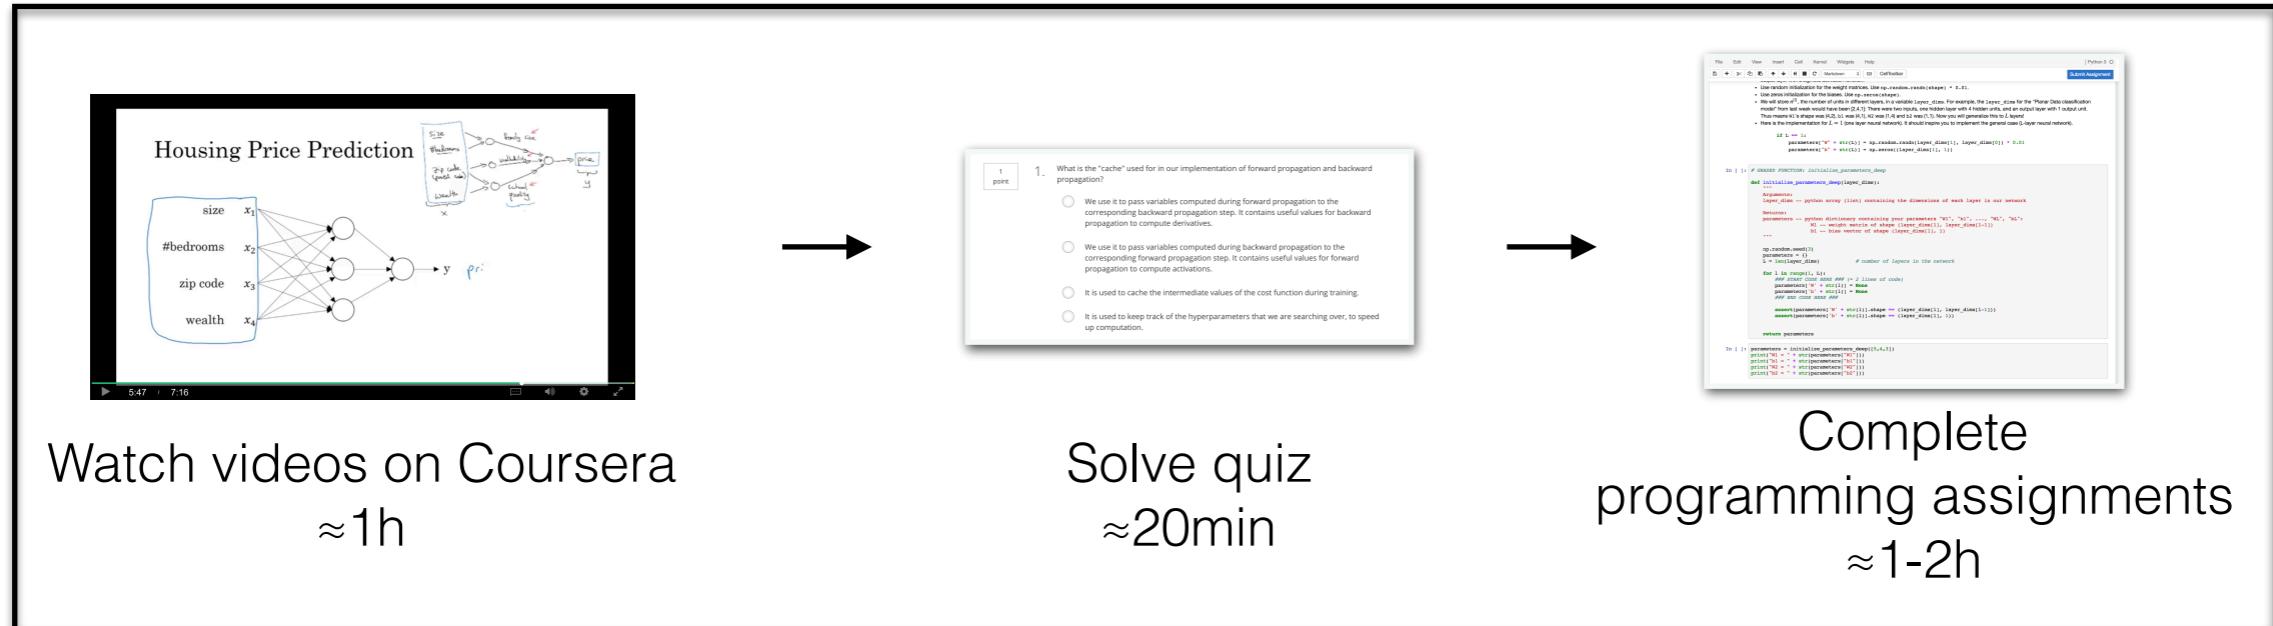

Schedule is on <http://cs230.stanford.edu/syllabus/>

We use Coursera: www.coursera.org

The class forum is on Piazza: piazza.com/stanford/winter2020/cs230

One week in the life of a CS230 student

1 module

1 week of class \approx 2 modules + Go to in-class lecture $\approx 1\text{h}20$ + TA sections on Fridays $\approx 1\text{ hour}$ + 15min project mentorship with TA

Assignments and Quizzes are due every Tuesday at 8am
Do not follow the deadlines displayed on Coursera!!!

Grading Formula

$$Grade = 0.02A + 0.08Q + 0.25Pa + 0.25M + 0.40Pr$$

A = Attendance

Q = Quizzes

Pa = (Programming) assignments

M = Midterm

Pr = Final-project

Active Piazza participation = 1% bonus

Late days

Example: For next Tuesday at 8am you have to complete the following assignments:

- 2 Quizzes:
 - ★ Introduction to deep learning
 - ★ Neural Network Basics
- 2 Programming assignments:
 - ★ Python Basics with Numpy
 - ★ Logistic Regression with a neural network mindset

At 7am on Tuesday: you submit 1 quiz and the 1 PA.

At 3pm on Tuesday: you submit the second quiz.

At 2pm on Wednesday: you submit the second PA.

How many late days did you use?

3 late days

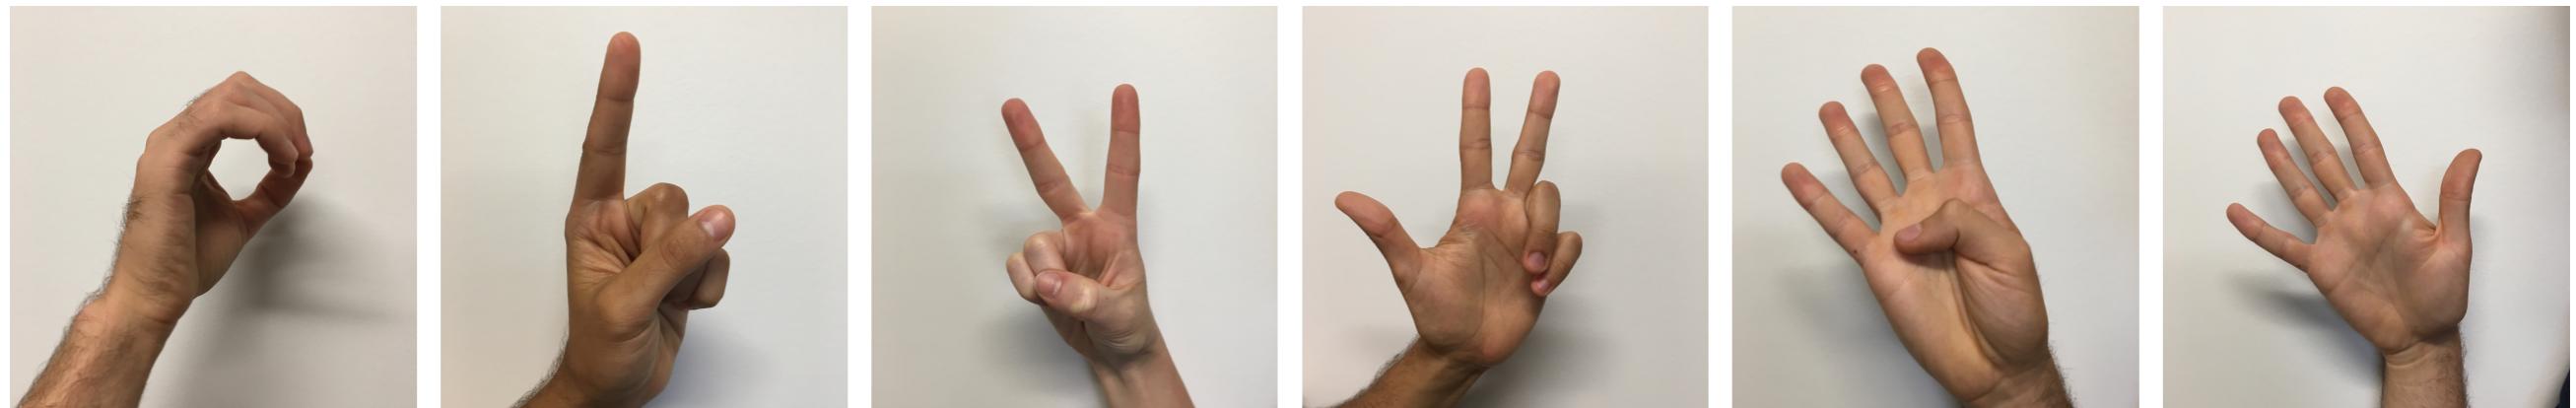

Today's outline

I. Course Logistics

II. Introduction to Deep Learning Applications

III. Examples of student projects

Projects: SIGN language image classification

$$y = 0$$

$$\begin{bmatrix} 1 \\ 0 \\ 0 \\ 0 \\ 0 \\ 0 \\ 0 \end{bmatrix}$$

$$y = 1$$

$$\begin{bmatrix} 0 \\ 1 \\ 0 \\ 0 \\ 0 \\ 0 \\ 0 \end{bmatrix}$$

$$y = 2$$

$$\begin{bmatrix} 0 \\ 0 \\ 1 \\ 0 \\ 0 \\ 0 \\ 0 \end{bmatrix}$$

$$y = 3$$

$$\begin{bmatrix} 0 \\ 0 \\ 0 \\ 1 \\ 0 \\ 0 \\ 0 \end{bmatrix}$$

$$y = 4$$

$$\begin{bmatrix} 0 \\ 0 \\ 0 \\ 0 \\ 1 \\ 0 \\ 0 \end{bmatrix}$$

$$y = 5$$

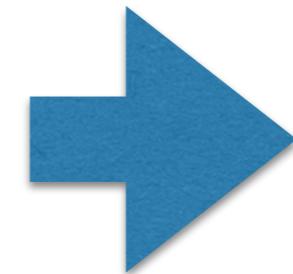

$$\begin{bmatrix} 0 \\ 0 \\ 0 \\ 0 \\ 0 \\ 0 \\ 1 \end{bmatrix}$$

Assignment: The Happy House

$y = 0$

$y = 0$

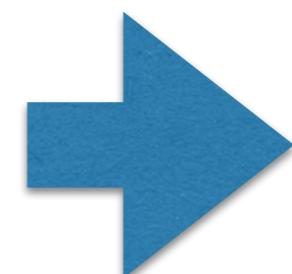

can't enter
the Happy House

$y = 1$

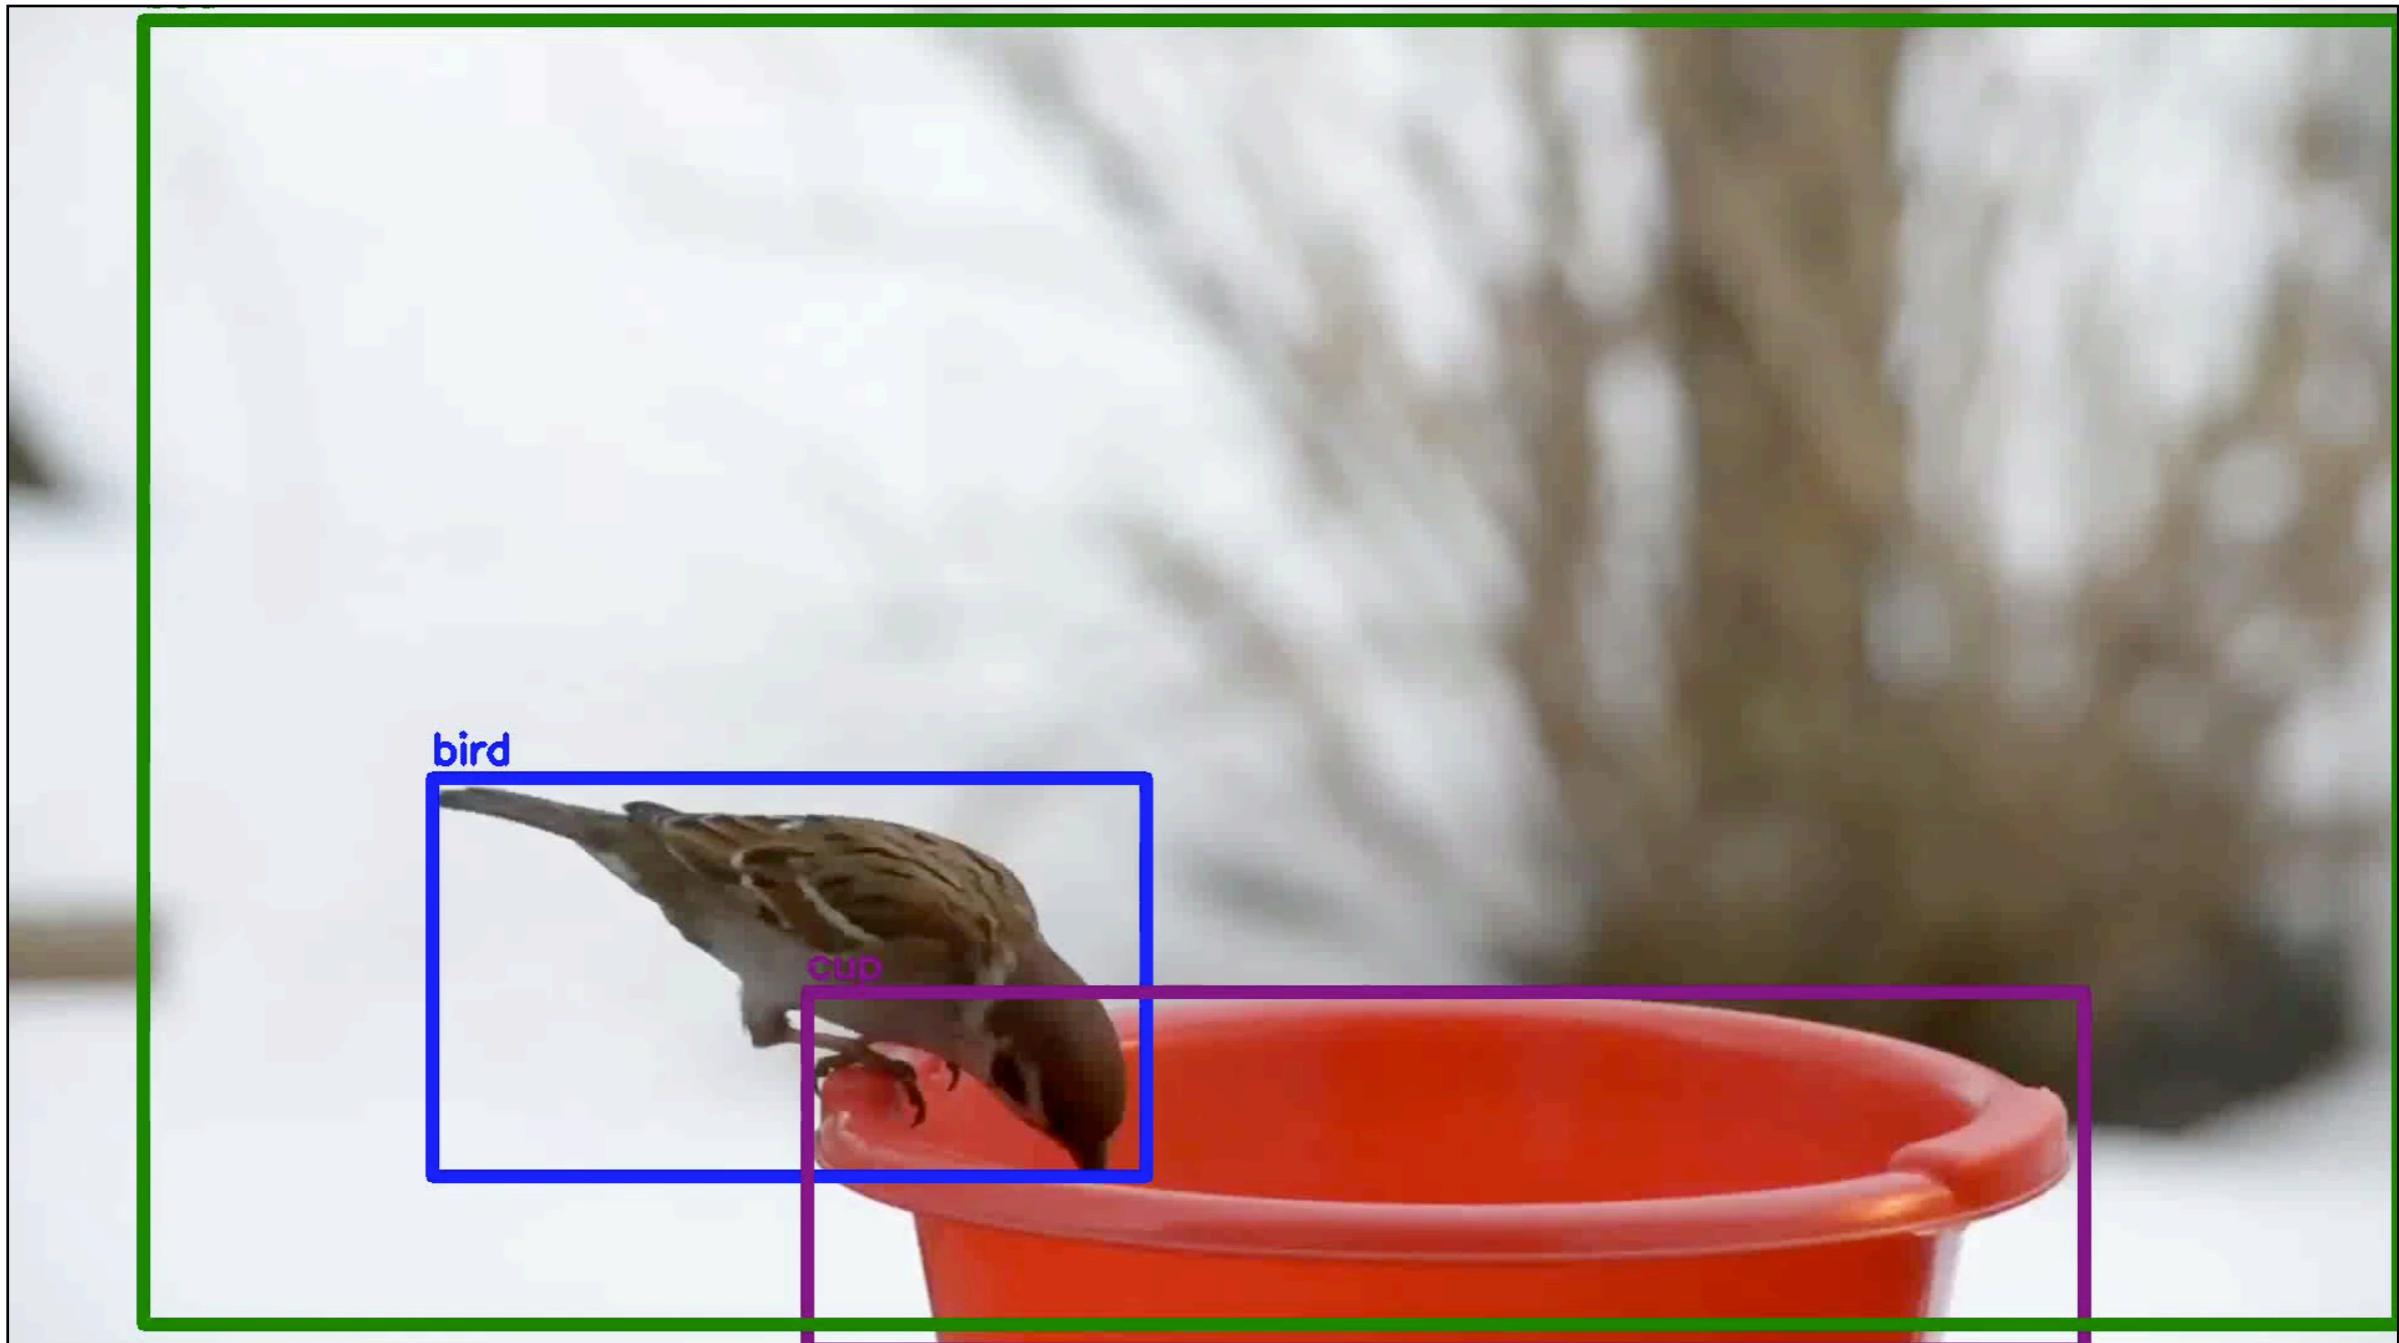

$y = 1$

can enter
the Happy House!

Assignment: Object detection

Projects: others

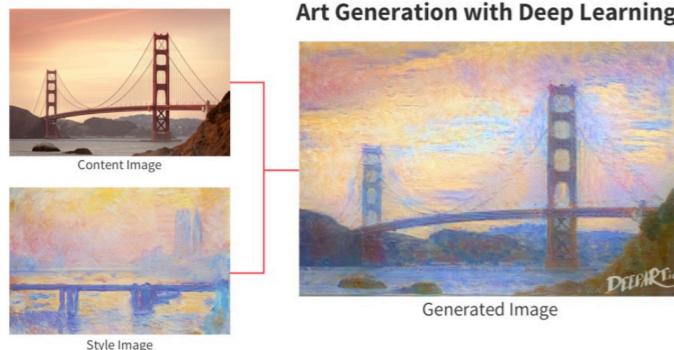

Optimal goalkeeper shoot prediction

Car detection

Face recognition

Art generation

Music generation

Text generation

“I love you”
↓

Emojifier

Machine translation

Trigger word detection

And many more...

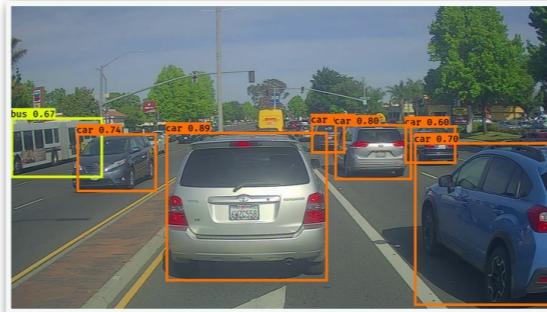

Assignment: Car detection for autonomous driving

Projects: others

Optimal goalkeeper shoot prediction

Car detection

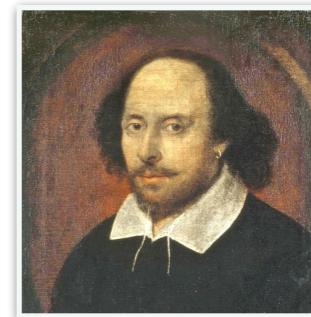

Face recognition

Art generation

Music generation

Text generation

“I love you”
↓

Emojifier

Machine translation

Trigger word detection

And many more...

In the style of Claude Monet

In the style of Yayoi Kusama

In the style of Piet Mondrian

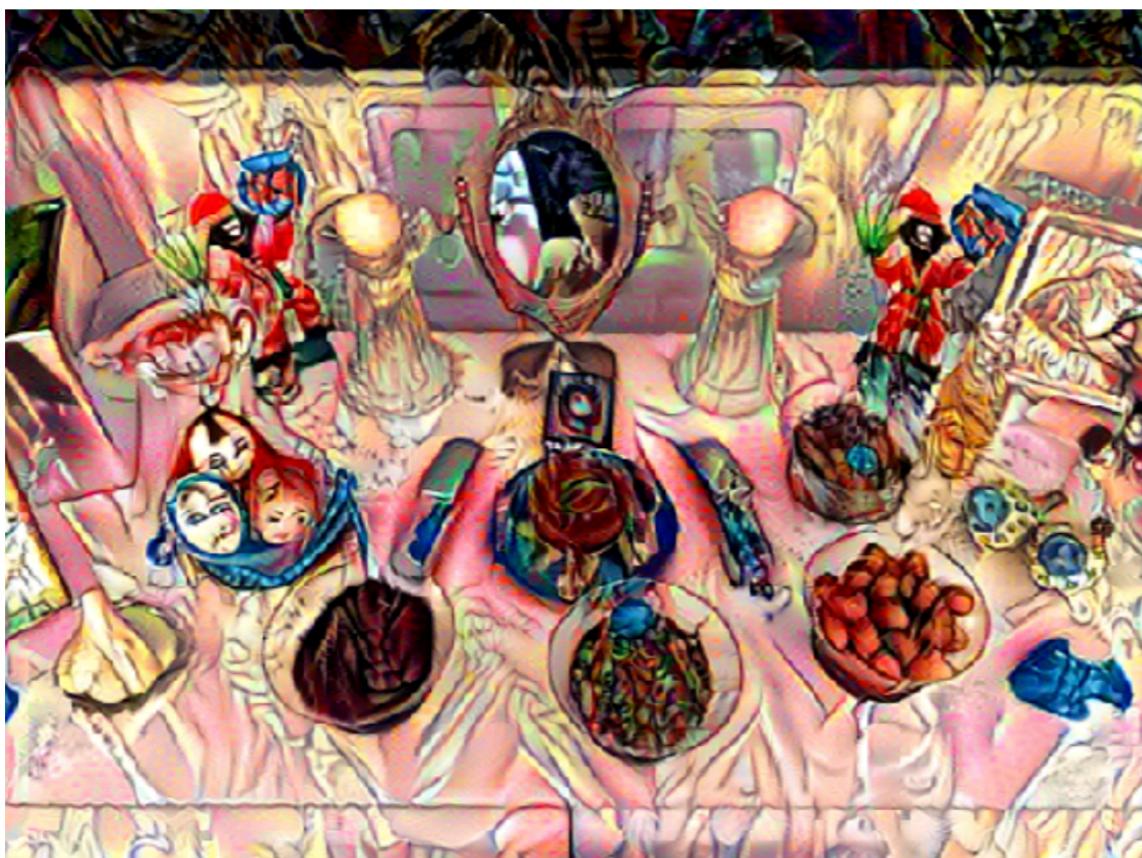

In the style of Pablo Picasso

In the style of Hilma af Klint

In the style of Jamini Roy

In the style of Eiichiro Oda

In the style of Salvador Dali

Projects: others

Optimal goalkeeper shoot prediction

Car detection

Face recognition

Art generation

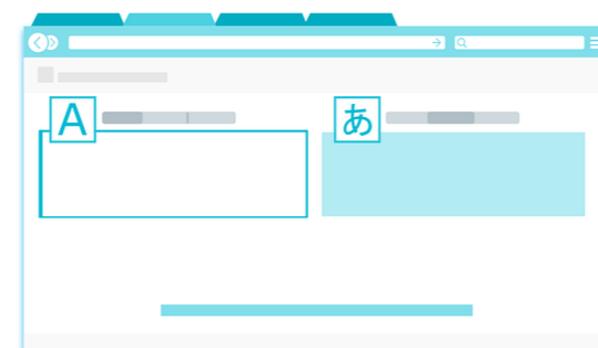

Music generation

Text generation

“I love you”
↓

Emojifier

Machine translation

Trigger word detection

And many more...

Today's outline

I. Course Logistics

II. Introduction to Deep Learning Applications

III. Examples of student projects

Projects: others

LeafNet: A Deep Learning Solution to Tree Species Identification

Predicting price of an object from a picture

Projects: others

Detect cards from real-time video of tournaments to improve viewer understanding and accessibility

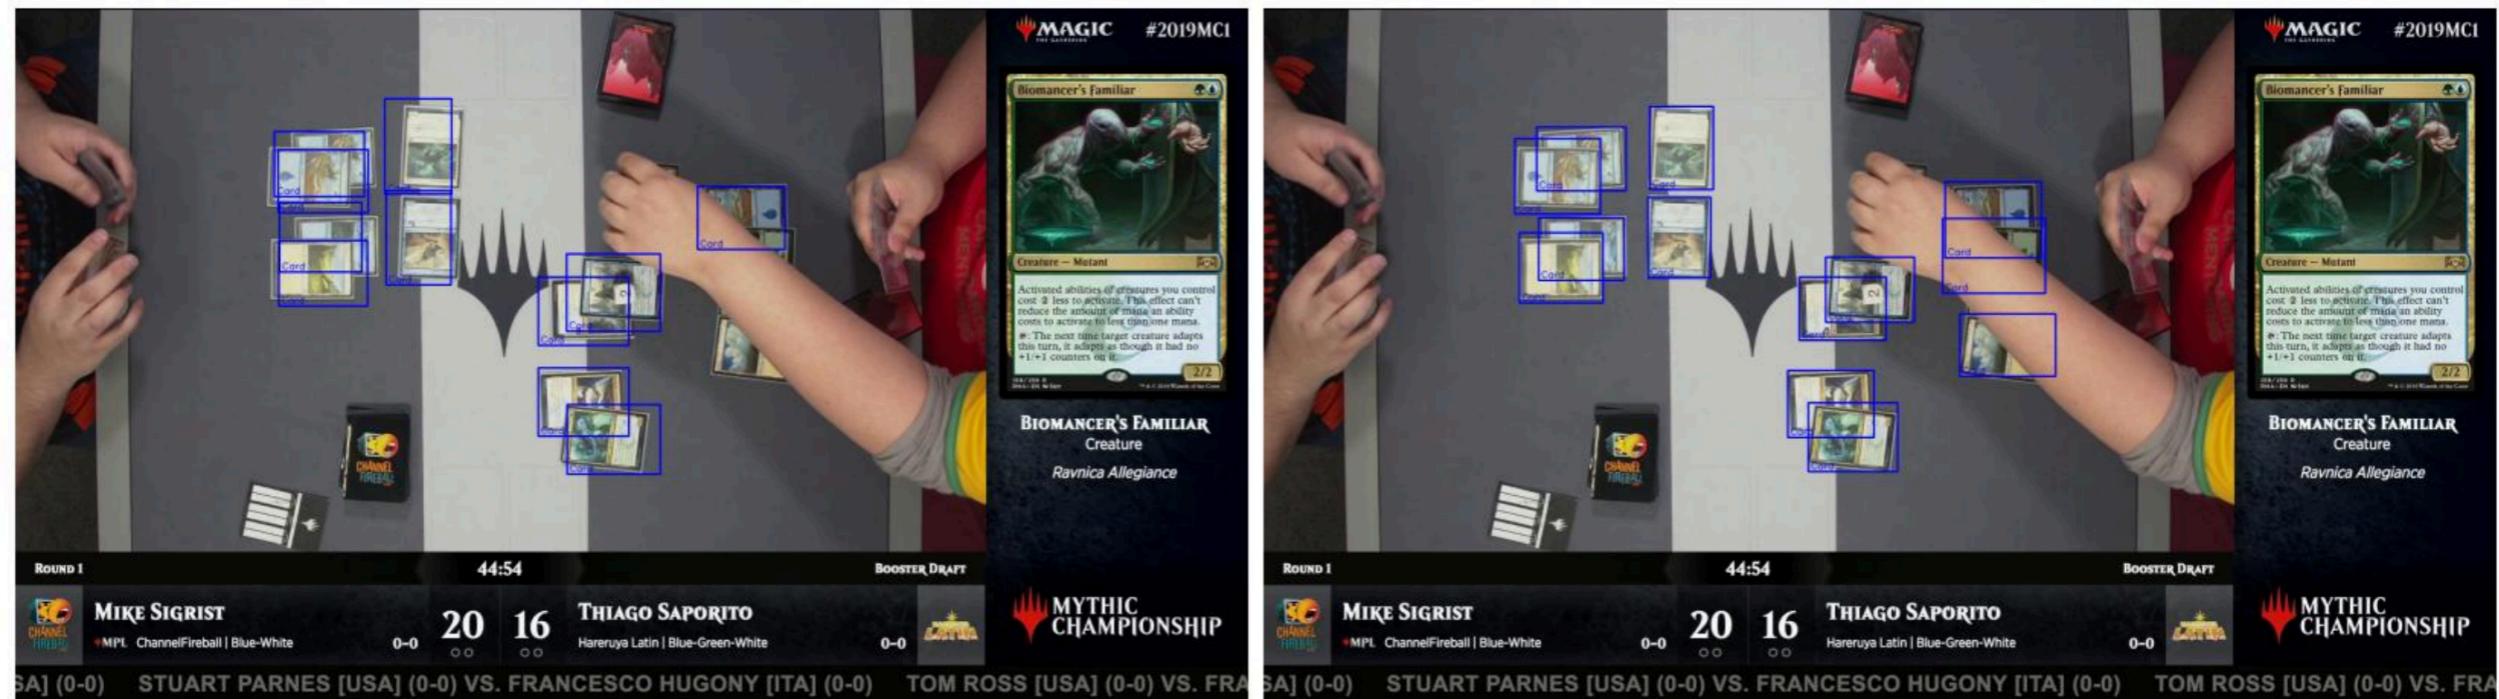

Figure 2: Predicted objects on a single frame from Dataset 1 produced by my model (left) and the YOLOv3 baseline (right).

Projects: others

NBA 2k19 DeepBaller: A NN-Controlled Real-Time video game AI

Projects: others

Crop-type classification for small holder farms

Visualization of the objective:
Use temporal satellite imagery to map crop type from space.

Figure 5: Qualitative Performance in Germany (left) and South Sudan (right). Ground truth labels are in the top row while model predictions are in the bottom row. Each color corresponds to a different crop type.

Image-to-Image translation with Conditional-GAN

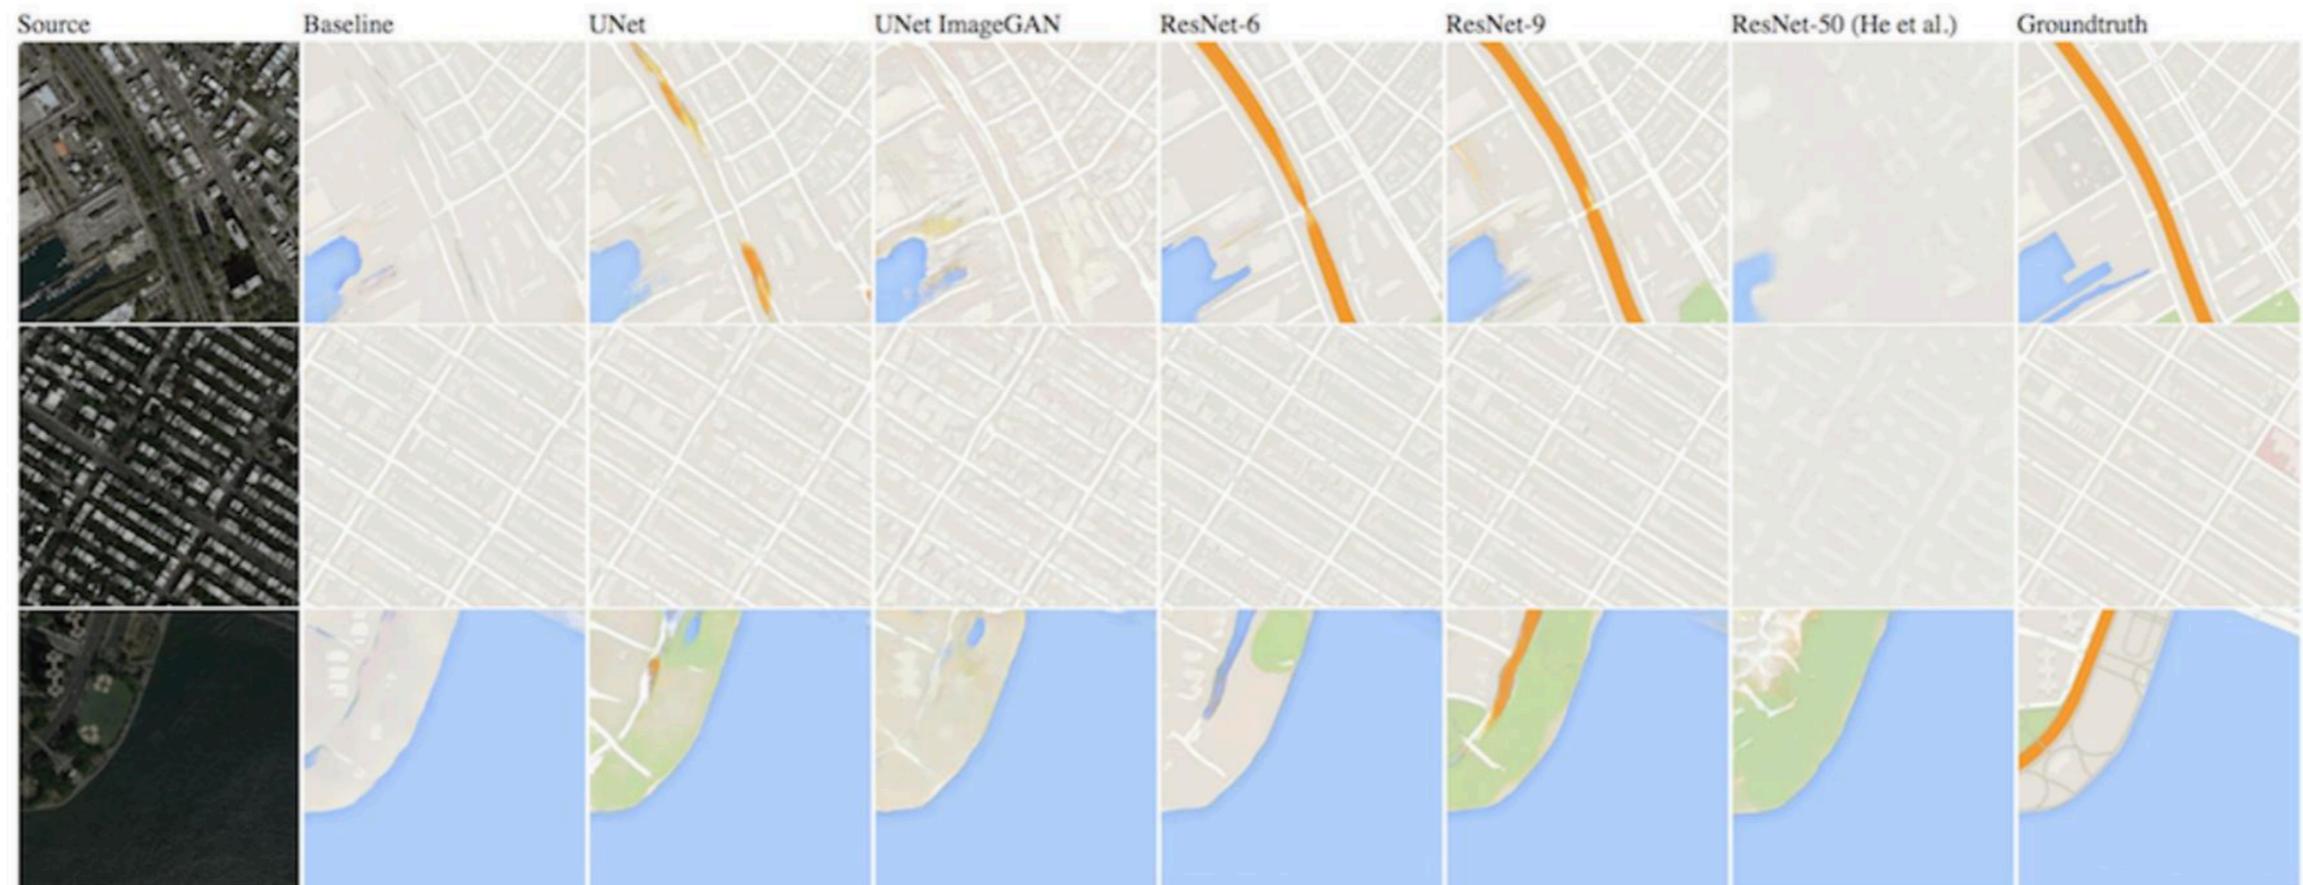

Figure 3: Generated map images of different architecture and hyperparameters. From left to right are source aerial images, baseline, U-Net, U-Net with ImageGAN, ResNet-6, ResNet-9, ResNet-50, and ground truth map images

Projects: others

Discrete reasoning in natural language processing

Reasoning	Passage (some parts shortened)	Question	Answer	BiDAF
Subtraction (28.8%)	That year, his Untitled (1981) , a painting of a haloed, black-headed man with a bright red skeletal body, depicted amid the artists signature scrawls, was sold by Robert Lehrman for \$16.3 million, well above its \$12 million high estimate.	How many more dollars was the Untitled (1981) painting sold for than the 12 million dollar estimation?	4300000	\$16.3 million
Comparison (18.2%)	In 1517, the seventeen-year-old King sailed to Castile . There, his Flemish court In May 1518, Charles traveled to Barcelona in Aragon.	Where did Charles travel to first, Castile or Barcelona?	Castile	Aragon
Selection (19.4%)	In 1970, to commemorate the 100th anniversary of the founding of Baldwin City, Baker University professor and playwright Don Mueller and Phyllis E. Braun, Business Manager, produced a musical play entitled The Ballad Of Black Jack to tell the story of the events that led up to the battle.	Who was the University professor that helped produce The Ballad Of Black Jack, Ivan Boyd or Don Mueller?	Don Mueller	Baker
Addition (11.7%)	Before the UNPROFOR fully deployed, the HV clashed with an armed force of the RSK in the village of Nos Kalik, located in a pink zone near Šibenik, and captured the village at 4:45 p.m. on 2 March 1992 . The JNA formed a battlegroup to counterattack the next day .	What date did the JNA form a battlegroup to counterattack after the village of Nos Kalik was captured?	3 March 1992	2 March 1992
Count (16.5%) and Sort (11.7%)	Denver would retake the lead with kicker Matt Prater nailing a 43-yard field goal , yet Carolina answered as kicker John Kasay ties the game with a 39-yard field goal Carolina closed out the half with Kasay nailing a 44-yard field goal In the fourth quarter, Carolina sealed the win with Kasay's 42-yard field goal .	Which kicker kicked the most field goals?	John Kasay	Matt Prater

And many more...

Predicting atom energy based on atomic-structure

Visual Question Answering

Cancer/Parkinson/Alzheimer detection

Activity recognition in video

Music genre classification / Music Compression

Accent transfer in a speech

Generating images based on a given legend

Detecting earthquake precursor signals

...

Check out past projects: <http://cs230.stanford.edu/past-projects/>

To sum up

1. You will learn about wide range of deep learning topics
2. The course is very applied, you will code these applications
3. You have access to mentorship to build an outstanding project in 10 weeks

For next Tuesday (01/13) 8am:

- Create Coursera account and join the private session using the invitation
- Finish **C1M1 & C1M2**
- 2 Quizzes:
 - ★ Introduction to deep learning
 - ★ Neural Network Basics
- 2 Programming assignments:
 - ★ Python Basics with Numpy
 - ★ Logistic Regression with a neural network mindset
- Find project team-mates and fill-in the Google form that will be posted on Piazza.

This Friday (01/09):

- TA section “Getting Started with Your Project”

Download your notebooks after you finished them!
Follow only the website deadlines!
